

Call for Workshop Topics and Speakers
MACC 2011 Annual Environmental Conference
March 5 • College of the Holy Cross • Worcester

Be an important part of the **LARGEST** environmental conference in New England in one of two ways - either suggest a thought-out good idea for a workshop OR propose your own fleshed-out workshop. The topic should be one that will enhance the knowledge and expertise of our region's environmental stewards. With almost 1,000 attendees, this daylong event has been held for over 30 years and includes about 30 workshops, 50 exhibits and presentation of MACC's Annual Environmental Service Awards. We invite you to help us keep your Annual Environmental Conferences strong and relevant.

We are now accepting workshop topic proposals and presenters for the 2011 conference.

To suggest a workshop topic - please submit on one page: suggested title; a description of the proposed content; the subject's specific relevance to Conservation Commissions; and any suggested speakers.

To propose giving a presentation, please submit the following information:

- Suggested Title
- Summary - describe content, format and specific relevance to Conservation Commissions (one page maximum)
- Abstract - provide a description of no more than 50 words to be used in program publicity.
- Handouts - include a list of handouts (strongly encouraged) you will provide.
- Audio-visual - indicate if you have equipment needs that you are unable to supply
- Short bios and resumes (if available) for any proposed speakers, with contact information

Submit your information in electronic form addressed to lindsay.martucci@maccweb.org. Or send to: MACC, 10 Juniper Road, Belmont, MA 02478, or fax to: 617.489.3935. **The deadline is September 15, 2010.** We get many workshop proposals so there is no guarantee that yours will be accepted. The most likely are those which propose a panel of two speakers, one a speaker who is experienced and expert in the subject, the other equally knowledgeable but independent of the first, so the audience gets a solid background as well as current developments, from two perspectives.
